Regarding the seismic retrofit of 21779 No View Dr. Hayward, CA, 94541

I am the owner and founder of Bay Area Retrofit, a residential seismic retrofit company I established 25 years ago.

I am writing this letter to inform you that the retrofit in the crawl space meets or exceeds the requirements for earthquake resistance found in your high shaking intensity shaking zone as defined by the building code. I performed [engineering calculations](#) to confirm this.

In addition, I carefully evaluated the work to make sure it meets the highest standards of the industry. Photographs to this effect have been provided.

If qualifications matter to you, I have been on both regional and national seismic retrofit code committees, been on local and national television as a nationally recognized expert, and am published in a national trade magazine. These and other achievements are described in the next two pages.
